

SERIAL SWITCH

Ciro Mazzone Radiocomunicazioni presents the new original accessory for your LOOP ANTENNA, the **SERIAL SWITCH**.

With this unit, you can simultaneously connect one PC, one transceiver and the ATU via the RS232 ports. Now you can control your transceiver and the ATU at the same time, using your computer software.

Connect the **SERIAL SWITCH** to the ATU via RS232 and RS485 ports, to the transceiver using one of the optional cables (see the list on the other side) and to the PC with the cable supplied with the **SERIAL SWITCH**.

Connect the **SERIAL SWITCH** to the ATU via RS232 and RS485 ports, to the transceiver using one of the optional cables (see the list on the other side) and to the PC with the cable supplied with the **SERIAL SWITCH**.

SPECIFICATIONS:

I/O:	2X RS232 1x RS485
POWER SUPPLY:	5V D.C. via RS485 port (no external power supply needed)
ABSORPTION:	30mA
OPERATING TEMPERATURE:	-10 to +50°C
ATU FIRMWARE	4.01 or later

Supplied package includes:

- 1 - SERIAL SWITCH with RS232 and RS485 connectors
- 1 - SERIAL CABLE for PC

OPTIONAL INTERFACE CABLES (for order www.ciromazzoni.com/shop)

CI-1	CI-V cable interface for ICOM radio with 3.5mm. JACK "REMOTE" connector
CI-2	CAT CABLE TYPE 1 only for YAESU radio with 8 pin CAT connector (FT817-818-857-897)
CI-3	CAT CABLE TYPE 2 for YAESU and KENWOOD with DB9 CAT connector
CI-4	KXser only for ELECRAFT radio with 3.5mm. JACK "REMOTE" connector
CI-5	FLEX only for FLEX RADIO
CI-6	RS-EL only for ELAD DUO radio
